

# **Elegance Lab Inc.**

## TheNextDDS App Screens

## Problems with old system

1. Too much of information placed on single screen
2. Complex information architecture of app
3. No user role management system to show the content category
4. Content and font size too small for a mobile device

## Solutions with new system

1. Improved UX and system capabilities
2. Reduced the number of screens, with screen customization for 3 different types of user (Student, Faculty, Sponsor) role
3. Full text search for app content

1

## UI Suggestions

- Splash screen
- Home screen
- Login screen
- Training wall

2

## Feature Addition

- Social Signup
- Filter on training wall
- Sponsor Store
- Payment gateway
- Rewards

3

## Proposed Solution

- Native IOS app
- Native Android app
- .Net Web app
- Admin

# Splash Screen

This will be the entry screen of the app.

Here we have used the Logo and Icon to represent the brand.

Additions to the Old UI

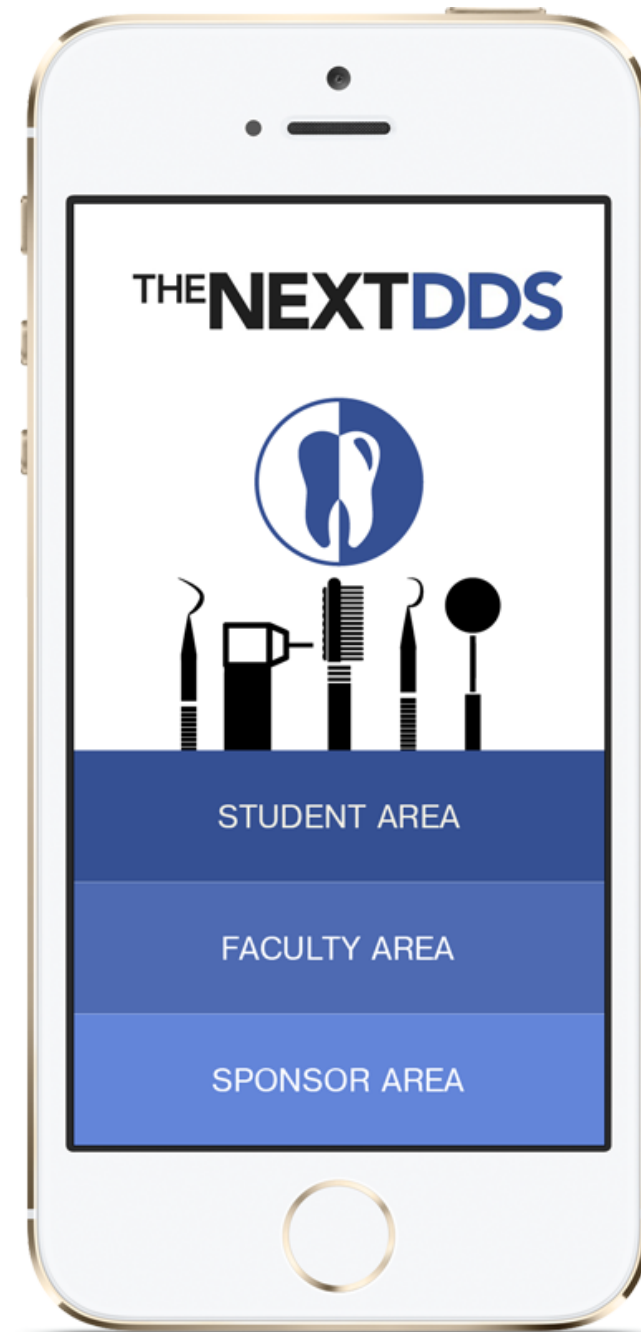

1. Added the tooth image to the logo to represent the industry domain

# Home Screen

This screen will be the landing screen of the app. User type associated with the app are “Student”, “Faculty” and “Sponsors”

We have provided the sections for users to sign in to their relevant module.

# Login Screen – Faculty and Student

This screen will be the signin screen of the app.

The design is proposed to represent the latest design standards for mobile app.

Social signin is used to allow user to use their social account to get onboard on TheNextDDS app; this feature will allow TheNextDDS app to connect to users social profiles to promote the app on user accounts.

Social signin feature

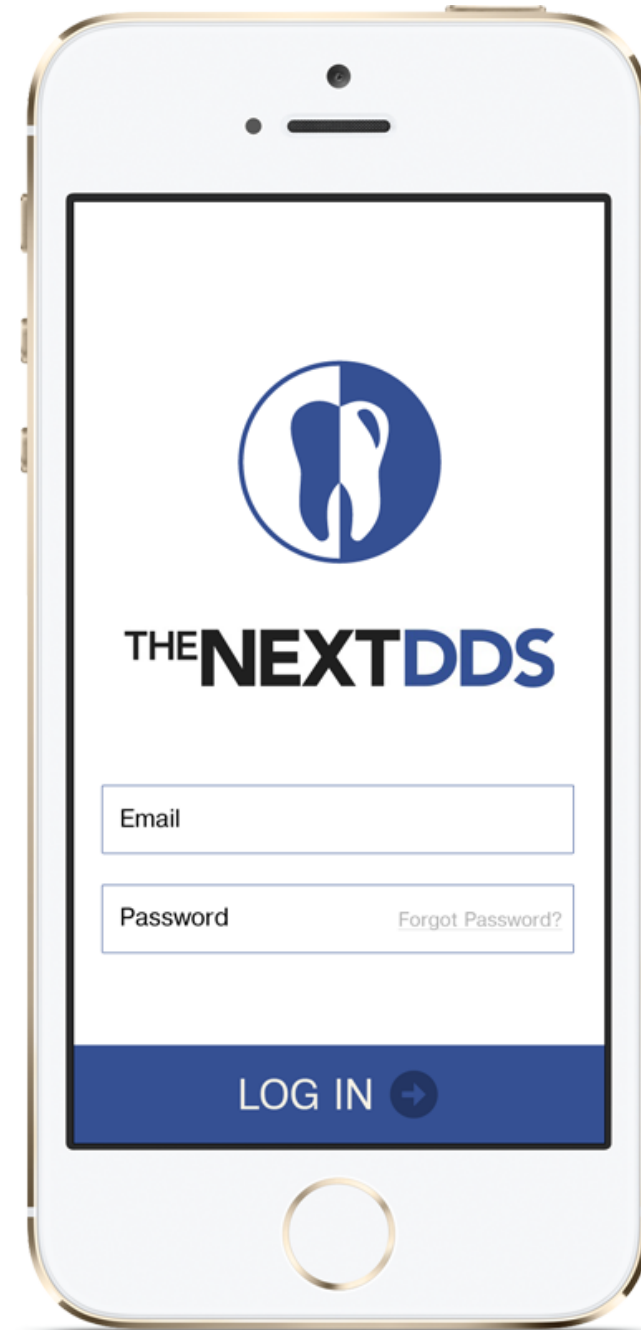

1. Signin with facebook
2. Signin with twitter
3. Signin with google

# Login Screen – Sponsor

This screen will be the signin screen for sponsor.

Social signin is not proposed for sponsor user.

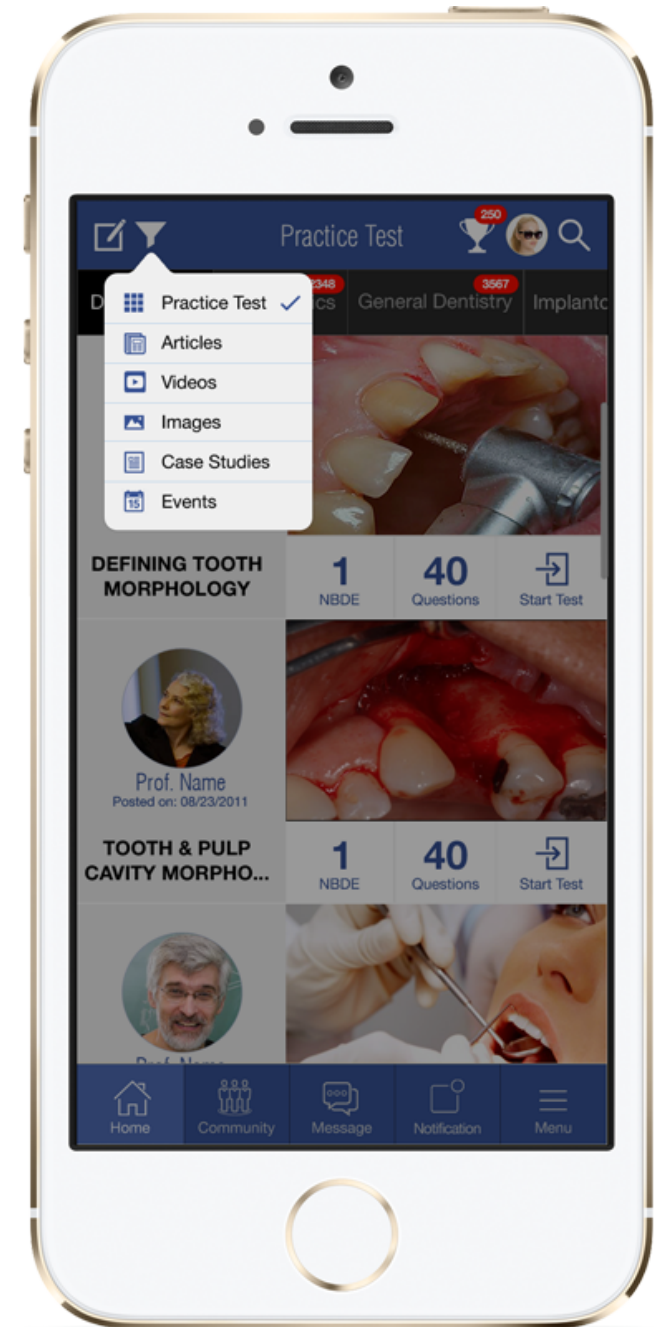

# Training wall

This screen provide the details of all the available trainings. This trainings will be posted by faculty user only. Here the student user will be able to take a test.

Training filter will help user easily navigate between the different trainings categories within the app.

Note: Test score will be added to student profile page.

Thank you!

Thank you!
